Marc Warren Partosa

Dumaguete City, Negros Oriental, Philippines

About Me

Aspiring Fullstack Developer with experience building functional and user-friendly applications. Known for being collaborative, approachable, and motivated to take on new challenges.

Education

Silliman University
Bachelor of Science in Information Technology
2022 - 2026

Recent IT graduate with strong programming skills and hands-on experience in system development. Proficient in multiple languages and focused on building practical, user-friendly solutions.

Work Experience

Sun Asterisk Philippines
Student Intern
November 2025 - February 2026

I started as a QA, testing new features and reviewing pull requests to ensure functionality and maintain code quality. While working as a Developer, I handled various tasks including implementing new features, fixing bugs, and collaborating with team members on solutions. Throughout this time, I continued performing QA responsibilities, reviewing code and testing updates to help maintain the overall quality and reliability of the project. This experience allowed me to develop a strong understanding of the team's workflow, project processes, and best practices in both development and quality assurance.

Certifications

12th TOPCIT Certificate
July 2025
http://bit.ly/4h9Hp0N

Introduction to Frontend Development
July 2023
http://bit.ly/4n4SzoC

Complete Web & Mobile Designer: UI/UX, Figma
July 2023

Technical Skills

Frontend Development

Experienced in building web and mobile applications using **React**, **Next.js**, **TypeScript**, and **Tailwind CSS**. Knowledgeable in creating reusable components and managing application state to keep interfaces smooth and organized.

Backend Development

Experienced in building and maintaining server-side applications using **NestJS** and **Express JS**, with a strong understanding of object-oriented programming (OOP). Have a solid foundation in **C**, along with experience in **C++**, and **Java** for developing efficient and scalable backend systems.

API Development

Knowledgeable in designing, testing, and managing **REST** and **GraphQL** APIs. Experienced in using **Postman** for efficient development, debugging, and integration.

Database Design & Development

Skilled in designing and developing SQL databases such as **MSSQL**, **MySQL**, and **Supabase** using **Prisma**, as well as NoSQL databases like **MongoDB** and **Firebase**. Experienced in visualizing database structures and workflows with **Lucidchart** for clear and organized system design.

Version Control

Knowledgeable in using **Git** and **GitHub** for source code management, collaboration, and version tracking. Experienced with **Docker** for containerizing applications and ensuring consistent environments.

Deployment

Knowledgeable in hosting platforms such as **Vercel**, **Hostinger**, and **Render**.

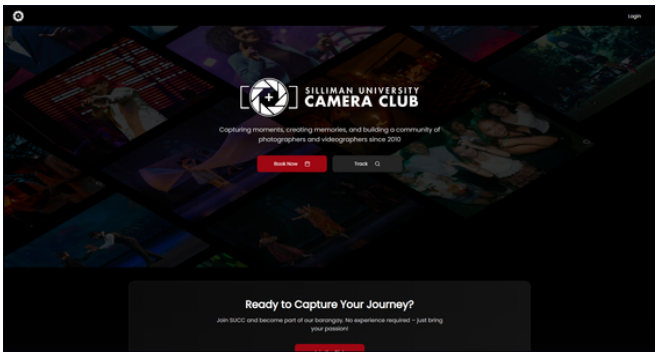
AI Tools

Proficient in using AI tools such as **Claude AI and ChatGPT (OpenAI)** to enhance productivity in coding, problem-solving, and research.

My Projects

The Silliman University Camera Club Portal

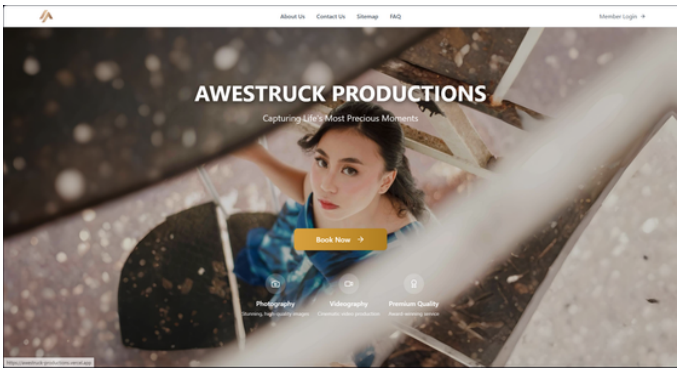
https://succ-portal.vercel.app



Worked as a Full Stack Developer on the Silliman University Camera Club portal, building a system that manages bookings, events, member management, equipment, and recommendations, ensuring successful integration across modules.

Awestruck Productions

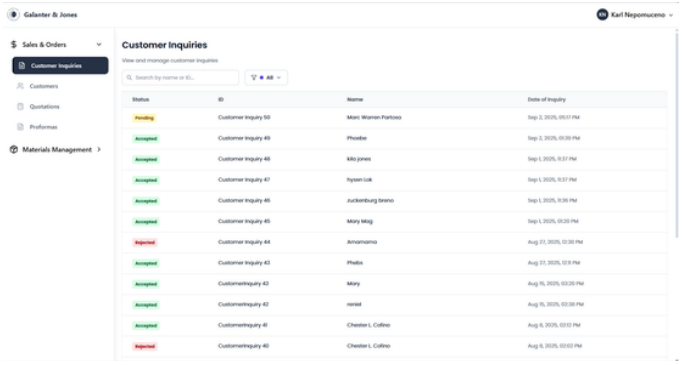
https://awestruck-productions.vercel.app



Worked as a Frontend Developer on a booking and event management system, building responsive and user-friendly interfaces using Tailwind CSS.

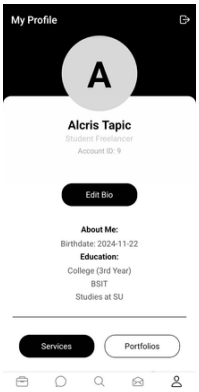
Galanter and Jones

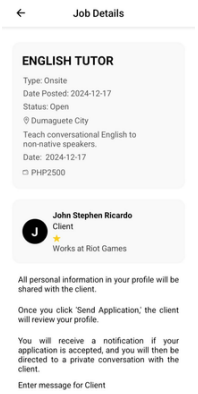
https://galanter-and-jones.vercel.app



Worked as a Frontend Developer on a sales and order management system, building modules for customer inquiries, quotations, and proformas, with features like email notifications and PDF generation.

Homework





Worked as a Frontend Developer on a mobile app connecting students with freelancing opportunities, building a system that manages freelancer and client modules, Google Maps integration, and in-app messaging, ensuring seamless user experience across features.
